Class Name: York

Term: Term 3

Topic: Reduce, Reuse and Recycle

What we have been doing this term:

Some photos of us!

York have had an amazing term!

In **maths** we have been learning about money. We have worked on our own pop up shop and buying and giving correct money. We have also been sorting coins and have seen great progress throughout the term.

In **topic** we have been looking at recycling and have looked at sorting materials into different bins. We have also been looking at upcycling in **art** as well and been doing decoupage on to an old chair to give it new life. We are hoping to have this show cased at the front of the school where children are dropped off and picked up from.

In **English** we have been working on our letter formations and motivational words. All students have been excelling and improving so much with this throughout the term. In **phonics** we have been working on all groups in phase 2 & 3. They have really enjoyed the different games and activities we have found to help with our learning.

We have started **hydrotherapy** the last few weeks and all the children have made progression each week. They have all loved the different play equipment we have used each week. They have all done amazing independent dressing with mainly verbal prompts ☺ We have also been going to **Post 16** to use their **sensory room**. Students have really enjoyed this and being able to explore a new place and see new people in a safe environment.

We have really looked into safety and transitioning regularly. This term they have all come on leaps and bounds with their transitioning, whether it's from Liddington House to Donnington house, shopping in the community, to hydro on site or to a whole new place, Post 16.

Dates & Points to remember:

First day back: Tuesday 7th January 2025

Last day of term: Friday 14th February 2025
