

Classroom News

Class Name: Oxford Term: Summer 1

Topic: Centurions

What we have been learning this term:

English: In English we have been looking at significant people within the last 100 years including David Attenborough and Malala. There has also been some preparation for those who will be taking their functional skills test in the summer term.

Maths: We have been looking at telling the time and money. As a class we have been working out addition and subtraction problems with money.

Vocational Studies: This term we have been looking back at what we have learnt so far in vocational studies and planned places we would like to visit in the last term before the summer.

Citizenship: We have continued to learn about money management, We have been looking at budgeting and how it can be used in everyday life. We started a project around the weekly shop and used our skills from ICT to create a budgeting spreadsheet.

ICT: This term we have been building our own websites! Each student has been able to make a website with their own theme and create different information pages.

Cooking: As a class we have continued to visit post 16 for our cooking lessons. This term we have been continuing with our quick and easy meals. The class has been able to use their skills to make a meal even without a recipe to follow!

PSHE: Our focus this term was personal hygiene and wellbeing. We have been looking at hygiene routines and how these may change depending on the weather and activities we take part in.

Art: This term we took part in a workshop with a local artist to create some artwork of different birds. This artwork will be on display at Thatcham lakes next month.

Some photos of us!

Photos from a visit to The BASE
